FOR IMMEDIATE RELEASE

Synergy Glass and Door earns NACC Certification

Philadelphia – [Synergy Glass and Door](#), an architectural glass & metal contractor based out of Philadelphia, has earned the North American Contractor Certification (NACC) for Architectural Glass & Metal contractors. The NACC Program for Architectural Glass & Metal Contractors is awarded to those contractors who demonstrate consistency, quality, and safety excellence. Other contractors recently receiving certification include [A & A Window Products, Inc.](#) (Malden, Massachusetts) and [Architectural Glass & Aluminum Group, Inc.](#) (Livermore, CA).

The NACC Program was created to provide certification recognition as a means of creating a baseline for competency, business practices, and adherence to industry-accepted guidelines. The program provides confidence to building owners as well as the design and construction community with defined processes, controls, and procedures to help drive a higher quality end product.

Beyond simply being recognized for a commitment to high quality, the audit process for the NACC program is helping to strengthen certified companies. Pat McIntyre found value in the NACC's audit:

“Achieving the NACC certification is a huge step in the growth of our company. Throughout this process, we learned ways to better improve our day-to-day systems. We saw areas in both office and field procedures that needed attention and we made these changes.”

Synergy joins an ever-growing list of NACC-certified architectural glass & metal contractors. Visit the NACC website (www.naccprogram.com) for a full listing of certified contractors as well as those currently with applications in progress.

About the North American Contractor Certification Program

The NACC Program is an ANSI-accredited certification that was developed by industry professionals and decision makers (such as architects, engineers, general contractors, etc.) who wanted a tool to identify the highest-quality companies in the architectural glass & metal industry. With Administrative Management Systems, Inc. (AMS) (www.amscert.com) serving as the certification body, **the program gained ANSI accreditation in accordance with ISO/IEC 17065. For more information about the North American Contractor Certification program visit www.naccprogram.com.**
